

Dust Barrier Door Curtain Folding Instructions

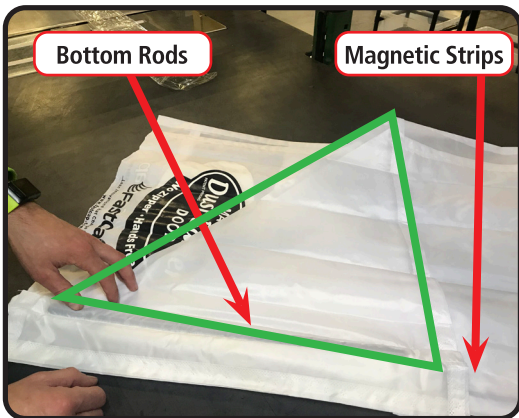

1. Fold in half "hot dog" style so the 2 windows match up

2. Fold the top section of curtain "hamburger style" over the windows. Being sure to fold between the long strips of magnet so as not to bend or kink them.

3. Fold the remainder in half "hamburger style" again so that the bottom edge of the door ends up on top. (again fold on the gap between the long magnet strips)

4. Fold back the bottom of the door at a 45 degree angle, so that the rods in the bottom of the door end up on top of the magnetic strips (like folding a flag or a sail.)

5. Starting with the rods and magnetic strips, begin folding or rolling the curtain (loosely is recommended.)

Instructions for folding curtain with magnetic strips left in slots.
